

SUBURETHRAL TAPE FOR THE
TREATMENT OF FEMALE STRESS
URINARY INCONTINENCE

 **I-STOP[®]**

THE NON-DEFORMABLE* TAPE FOR INCONTINENCE

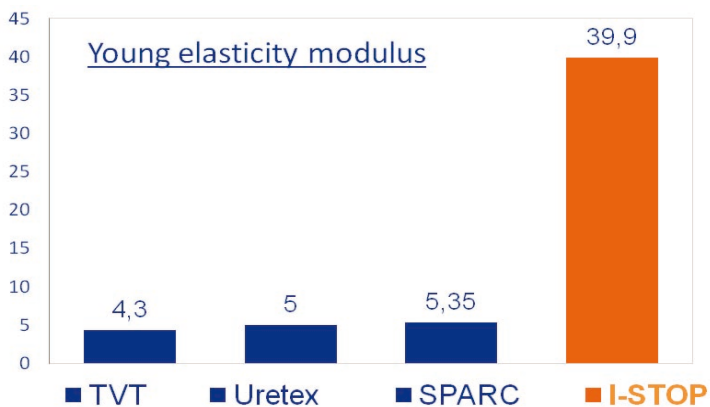

I-STOP®

DESIGN FEATURES

- * Resistance to traction (no «rope effect»)
- * Dimensional stability - low elasticity
- * Atraumatic looped edges
- * No particle release
- * Light weight
- * Macropore knitting
- * Type 1 100 % monofilament polypropylene
- * Needles for retropubic, suprapubic, ransobturator outside-in, transobturator inside-out techniques

RESISTANCE TO DEFORMATION

PRODUCT CODES

Reference	Technique
IS-1	* Transobturator route out-in (Emmet needle) * Retropubic Route
IS-2	* Transobturator route out-in (Helical needle) * Retropubic Route
IS-3	* Transobturator route out-in (Helical needle) * Transobturator route out-in (Emmet needle)
IS-5	* Transobturator routes out-in (Emmet needle and Helical needle) * Retropubic Route
IS-6	* Transobturator route in-out (Helical needle) * Guide
IS-7	* Large Transobturator route out-in (Helical needle)
IS-8	* Retropubic Route
IS-9	* Large Transobturator route out-in (Helical needle) * Retropubic Route (RPU)
IS-10	* Large Transobturator route out-in (Helical needle) * Retropubic Route (RPU)
IS-12	* Retropubic Routes (RPU7 and RPU8)
IS-13	* Large Transobturator route in-out (Helical needle)
IS-HELICO-01	* Transobturator route out-in (Helical needle)
IS-11-RO	* Transobturator route in-out (retro-obturator needle)

CLINICAL DATA

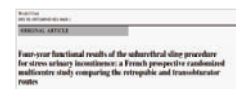

EUROPEAN UROLOGY 2005
* 604 CASES - TOT
* MUCH LESS RETENTION, DYSURIA, DE NOVO URGENCY

EUROPEAN UROLOGY 2006
* PROSPECTIVE AND RANDOMIZED TRIAL
* SAME BETTER RESULTS ON BLADDER SYMPTOMS

CLEVELAND CLINIC 2010
* 192 CASES
* 0 EROSION

WORLD J. UROLOGY 2011
* 4 YEARS OF FOLLOW UP
* 0 EROSION

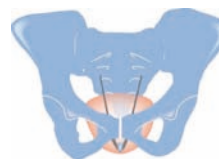

JOURNAL OF UROLOGY 2012
* 5 YEARS OF FOLLOW UP
* 75% SUCCESS

INTERNATIONAL UROGYNECOLOGY JOURNAL 2013
* 247 CASES
* FIRST CASES IN 2007
* 0 EROSION
